

work to-date. The excuses I get are that USDA  
is using a new computer accounting program and there  
are bugs in the program. This does not pay my  
operating expenses. I am not rich, so I have to borrow  
money to work on. I pay from 7-21% interest depending  
on the source and age of the loans. I need to be paid.

You can help me by asking Bruce Knight,  
and state Conservationist Larry Butler in Texas  
to give this matter due attention. There other  
TSP's here in Texas, and all have had problems getting  
paid.
